

A SOCIALIST PROGRAM TO FIGHT COVID-19 AND THE ECONOMIC CRISIS

The devastation of the coronavirus pandemic is a product of capitalism, a system that puts profit over the lives of people. To fight the virus, fight for socialist revolution!

- ★ Immediately double the wages of all essential workers on the frontlines of the fight against COVID-19! Quadruple their ranks and fight unemployment by training millions more to help take up the strain. Guarantee safety protections and union recognition!
- ★ For a federally guaranteed national minimum wage of \$1,000 per week, including all laid-off workers, the sick, and the quarantined. Large companies that cry poverty should be forced to open their books and nationalized under democratic workers' control.
- ★ Workers' control to suspend all non-essential production for profit to stem the spread of the disease. Where possible, retool production toward essential services and healthcare needs. Form workers' health and safety committees in every factory and workplace to oversee conditions and implement necessary provisions.
- ★ Any essential workplace that is closed, lays off workers, or requests a public bailout should be nationalized and run under democratic workers' control! For a rational plan of production that ensures no disruption in the supply chain of food, medical supplies, and other essentials!
- ★ Socialized health care free at the point of service. Nationalize the entire health sector and integrate it into a democratically administered public health provider. Nationalize all essential commercial spaces and convert those most suitable into hospitals as quickly as possible.
- ★ For immediate price controls on all essential items, to be enforced by elected committees in working-class neighborhoods. Anyone caught speculating on the misery of others to be immediately relieved of their goods—to be distributed to those in need.
- ★ For an immediate and indefinite moratorium on utilities, rent, mortgage payments, and evictions. Drop mortgage loan rates to zero and renegotiate terms for working families. Nationalize vacant homes and use them to end homelessness and overcrowding.
- ★ No to the lie of "national unity!" The interests of the workers and the capitalists are diametrically opposed—the working class can only rely on its own strength and class-independent organizations. Break with the two-party system—for a mass working-class socialist party!
- ★ While we will voluntarily observe social distancing in the interests of public health, we demand that our basic needs be guaranteed and will not accept any limitation of our First Amendment rights in the name of the national emergency.
- ★ Write off all debts of working people! Expropriate all the major banks and corporations without compensation, to be administered under democratic workers' control and integrated into a socialist plan of production to meet the needs of society.
